REFERENCE

# Revision tracker

*Reading a topic is not knowing it. Evidence is.*

Every examinable topic in Group II, in ICAI syllabus order. Click a dot to record how far you have actually got. Status is stored on this machine only. Downgrade a row the moment a past-paper question exposes a gap — that is the whole point of tracking it.

# How to use it

The four columns are a ladder, not a checklist. Clicking a column fills everything to its left; clicking a lit column switches it and everything right of it back off.

| LEVEL | MEANS |
| --- | --- |
| **Read** | You have read the topic once. Worth almost nothing on its own. |
| **Worked a sum** | You did a problem or wrote the format out yourself, with the book shut. For theory topics: you wrote the answer, not read it. |
| **Can write it cold** | Blank paper, no prompt, correct format and correct terminology. For audit, that means the Standard’s own vocabulary. |

| LEVEL | MEANS |
| --- | --- |
| **Past-paper proven** | You got it right in an actual ICAI past paper, RTP or MTP question under time, weeks after first reading it. |

# The 149 topics

0 of 149 concepts touched · 0 interview-ready
